Advances in Applied Data Analysis

Number of issues per year: 4
eISSN 2449-9994

Editor-in-Chief

Józef Dziechciarz, Wrocław University of Economics and Business, Poland

Managing Editor

Agnieszka Stanimir, Wrocław University of Economics and Business, Poland

The Econometrics. Advances in Applied Data Analysis is a scientific journal that promotes both theoretical aspects of mathematical, statistical and econometric methods as well as application possibilities.

It focuses on the presentation of the new, and the modernization of the well-known methods, as well as their adaptation in the economy, business processes and social sciences in their very broad meaning. Due to the fast pace of the publishing production process, the presented articles refer to the latest research, the papers are always up-to-date and original, scientific, and have never been printed before in other scientific journals. *The Econometrics. Advances in Applied Data Analysis* is the place of interdisciplinary debate with the participation of economists and statisticians.

The Econometrics. Advances in Applied Data Analysis has been published continuously since 1998. The subject area of the published articles covers theoretical and practical aspects of the methods of econometrics, statistics and mathematics. The domain of the applications of these methods covers wider economic issues, including macro and microeconomic analyses, statistical and econometric analyses and modelling market data, as well as capital investment and insurance problems.

Benefits of publishing in *Econometrics. Advances in Applied Data Analysis*:

- ▶ The journal offers a fast, honest and constructive review, carried out in the double-blind review process. After acceptance, articles are evaluated by a native speaker and a statistics editor – after which the publication process is very swift.
- ▶ *The Econometrics. Advances in Applied Data Analysis* belongs to the group of magazines that are consistently highly rated and enjoy a good reputation among authors and reviewers.

Wroclaw University of Economics and Business

The Wroclaw University of Economics and Business (founded in 1947) is a long-established centre of scientific and educational activities in the region. The WUEB is ranked among the top schools of economics in the higher education system in Poland, an important centre of education, science and research. The Publishing House of WUEB was established in 1955. Scientific monographs, textbooks, scripts, students' initial papers and scientific journals are published here. All 14 journals are published on the principle of Open Access. Our University has awarded honorary titles to 28 leading economists. Eight of the most prominent WUEB scientists have been awarded honorary titles by local and foreign institutions of higher learning.
